**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Priority***

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on 2/6/2001. It is noted, however, that applicant has not filed a certified copy of the Japanese application as required by 35 U.S.C. 119(b).

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

The claims are somewhat unclear and seem to be run on sentence fragments, which are hard to follow.

For example, in claim 1, applicant states that the at least one of the "upper surface side warps passes over two upper surface side wefts and the ground yarn knotting yarn." this is confusing as the ground yarn knotting yarn is also running in the warp direction as recited in the instant invention.

Claims 2, 5, and 6 seem to be contradictory from each other as claim two state that all or some of the upper surface side warps are comprised of the warp ground knotting yarns and then claim 5 (dependent to claims 1-3) and claim 6 (dependent to claim 5) recite limitations stating that the ground knotting yarns are different weft yarns.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-6, to extent that they were understood by the Examiner, are rejected under 35 U.S.C. 102(a) as being anticipated by Herring.

Herring discloses a multi-layer papermaker's fabric having upper and lower systems (warp and weft) of interwoven yarns interconnected into an integral fabric by a system of stitching yarns (ground knotting yarns).

Fig. 8 shows one embodiment where the warp yarns use a weave design repeat, which goes over two wefts and under three wefts as recited in claim 1.

The remaining claims are confusing to the examiner but seem to recite limitations with respect to different weaving patterns for the ground knotting yarn. Herring shows many different weave design patterns, which the examiner feels disclose the limitations as to the extent that the limitations of the claims were understood.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Various multi-layer industrial fabrics have been cited.
